

Sensory Rooms

Designed to stimulate and engage the senses.

Sensory rooms are typically used in various therapeutic and educational settings to provide individuals with a range of sensory experiences that can be beneficial for relaxation, sensory integration, and therapeutic purposes. Sensory rooms are commonly used for people with sensory processing disorders, autism, developmental disabilities, or those who simply need a calming and stimulating sensory experience.

The goal of a sensory room is to create a controlled and safe environment where individuals can explore and interact their senses in a way that meets their specific needs and preferences. These rooms can help individuals regulate their sensory input, reduce stress, anxiety, or overstimulation, and promote relaxation or engagement.

Sensory Corner Bundle

The Sensory Corner Bundle provides a wide variety of sensory experiences in just one corner of a room. Purchase a complete bundle with bubble tube, mirrors, projector, soothing sounds and fiber optics to create your very own corner sensory room in whatever location you need!

Model # - GENSRCB

- 1x BCB - Bubble Tube Additive
- 1x Bubble Tube Pump and Hose
- 1x Projector Bundle, including Aurora LED Projector, Wheel Rotator and 3 Effects Wheels (Firework Bonanza, Under the Sea and a blank wheel)
- 2x Calming Sounds CDs
- 1x Superactive LED Fiber Optic Bundle (includes Superactive LED Lightsource, Strands and 8 way Wireless Controller)
- 1x Bubble Tube Bracket
- 1x Installation Instructions

Calming Sensory Room

Featuring a 60" Calming LED Bubble Tube and soft padded platform, a user can sit close to the tube and watch as the bubbles steadily rise and the colors slowly change. The mirror ball produces spots of light that rotate around the room while the projector shows calming images that slowly rotate, creating a wonderful soothing environment. The Fiber Optic Softie provides a comfortable seat in which an individual can get close to the fiber optic strands and handle them while they slowly change color. These strands have no electricity in them.....only light, so they're safe to handle and provide a wonderfully tactile experience.

Model # - GENSRCSR

What's Included?

- 1 x Calming LED Bubble Tube -60"
- 1 x Fiber Optic Softie
- 1 x Fiber Optic Star Carpet including Calming LED Lightsource
- 1 x Projector Bundle including Aurora LED Projector, Wheel Rotator and 3 Effects Wheels (Under the Sea, Firework Bonanza and a blank wheel)

- 1 x Installation instructions

Premium Sensory Room

Perfect for interaction and calming, the equipment can be used for a variety of purposes, including the development of switching skills, cause and effect, color recognition, color matching, motor skills, social interaction and more.

The bundle includes our superactive LED bubble tube with a wireless control, allowing an individual to control the color and bubbles in the tube from a distance of up to 90ft. A soft padded platform allows the user to sit close to the tube and feel its vibrations while mirrors give the effect of multiple tubes.

Wall and floor padding is also included to create a safe area for people to sit or lie down and enjoy the calming music and lighting.

Model # - GENSRPSR

What's Included?

- 1 x Superactive LED Bubble Tube 60" & 9 way Wireless Controller
- 1x Square Bubble Tube Platform - Large 48" W x 48" L x 16" H

- 1 x Installation Instructions

Interactive LED Bubble Tube Corner

The Interactive LED Bubble Tube Corner brings a complete bubble tube package to your room or facility. Each package includes a 60" high color changing bubble tube, two reflecting mirrors and a soft padded platform. The Interactive Bubble Tube Corner allows individuals to get close to the bubble tube and control its colors while enjoying the reflections in the mirror.

A soft padded platform allows the user to sit close to the tube and feel its vibrations while the two acrylic mirrors give the effect of multiple tubes.

The equipment can also be used in a calming mode with slowly changing colors for relaxation or calming for individuals with Autism, ADHD, Sensory Processing Disorders, Anxiety or Dementia. This calming mode starts automatically if no button is activated for a period of 5 minutes.

Model # - GENSRBTC

What's Included?

- 1 x Interactive LED Bubble Tube—60"
- 1 x Interactive LED Bubble Tube Platform with built in switches
- 1 x Bubble Tube Acrylic Mirror Pair - 36" W x 48" H
- 1 x BCB - Bubble Tube Additive
- 1 x Bubble Tube Bracket

Dimensions:

- Bubble tube: 60"
- Mirrors: 48" H x 36" W
- Bubble tube platform: 16" H x 36" W x 36" L
- Bubble tube bracket: Fits any 6" diameter tube

Sensory Cocoons

The bubble tube is the anchor point for many sensory rooms, and by combining a bubble tube, platform, and mirrors with our new Corner Sensory Shower, we have created a one-of-a-kind sensory experience. Think of it like surround-sound for your eyes.

Options:

- Calming Cocoon **Model # - GENSRSCCC**
- IRIS Cocoon **Model # - GENSRSCIRIS**
- Superactive Cocoon **Model # - GENSRSCSC**

The Calming Model slowly changes colors on its own and is a perfect place to de-escalate and relax.

The Superactive Model gives the user the opportunity to change the color of the bubble tube and fiber optics by using a wireless controller.

The IRiS Model is compatible with all of our IRiS "Talkers", or controllers, and comes WITH the IRiS iConverter, which enables wireless control of the bubble tube and fiber optics with your iPad or iPhone (not included) .

What's Included?

- 1 - Bubble Tube
- 1 - Sensory Corner Shower (Calming, Superactive, or IRiS)
- 1 - Large, curved bubble tube platform
- 1 - Mirror Pair (48" x 48")
- 1 - Bubble Tube bracket
- 1 - BCB water treatment fluid (to control bacteria and algae)
- 1 - Bubble Tube pump and hose kit (to make water changes a snap!)
- 1 - 9-button Wireless Controller (Superactive model only)
- 1 - iConverter for control with iPad or iPhone (IRiS model only)

Climb through the curtain of light onto the platform and snuggle up to the bubble tube. Watch the bubbles slowly rise through the water, feel the vibration, and get your internal "motor" to that just-right place. Glance upward into the acrylic mirror on the ceiling and see fiber optic strands continue 'into' the ceiling and watch the bubbles seem to come at you! Truly an amazing effect!
